Advanced Manual Testing: Overview

This module provides foundational knowledge and practical skills in software testing using Manual Techniques. It is designed for beginners aiming to understand Software Testing Principles, Processes, and best practices without relying on Automation Tools. This module will make you proficient in testcase designing, testcase writing, bug raising and bug tracking. Industry experts who have been working on projects will be personally assisting in bringing out the best in you.

Contents:

tracking

Why Manual Testing:

If you are stuck in your field with no scope or growth in the future, or your domain has reached a saturation point, and you want to build yourself a stable, long-term career in IT, Manual Testing should be your go-to option. As manual testing does not require coding knowledge, you'll feel extremely comfortable leaning into it, and this is the reason anyone from IT or non-IT can learn and start working on Testing Projects.

Who is this course for

Anyone from non IT background who wants to build a career in IT

Anyone who is stuck in some non technical job with no scope or growth

Anyone who wants to start as a fresher in IT industry, Students from BSc and Engineering background

You are already a tester but not familiar with the basics and fundamentals

What you'll be doing

You'll be trained on all the relevant topics and concepts in Software Testing and immediately after you'll apply all the knowledge practically on real time projects using appropriate tools. All the tasks and activities are managed and monitored by working testers who are constantly in touch with the industry demands giving you a slight edge over normal teachers. During the course we'll be emphasizing more on the practical aspect rather than theoretical.

Career growth and scope

As reliability on Software is increasing continuously more and more Software and applications are getting developed for the smallest of tasks. In order to keep them working smoothly and to make sure they run without any issues software testers are required to continuously monitor and run maintenance checks on these applications and software. So this summarizes the scope of software testing. It'll keep on growing until there are software and applications being used.

Why learn from Cinute Digital?

Only skill up is not enough, you need a helping hand who has been in the industry for a long time and knows the industry in and out. Apart from it, networking, we have partnered with top colleges across Mumbai and tie ups with various IT service provider companies which enables us to get our students placed easily.

Learning Path

Cinute Digital Pvt. Ltd. In Action

Mode of Learning

CLASSROOM + **ONLINE**

CDPL has a Hybrid (**CLASSROOM + ONLINE**) training pattern where students have the opportunities to attend the sessions in **classroom** as well as **online**. CDPL trainers conduct the training sessions live from CDPL classrooms. All CDPL sessions are live streamed for students from that batch, also the learners are provided with the live recording sessions, thus enabling students to attend the same sessions online and interact with the trainer as well as other students.

All our certificates are validated with a unique authorization QR code.

Our Certification

We will be issuing a certificate from **Cinute Digital** with a unique QR code to validate from our portal. This certificate will be issued once completed with all assessment and mock interview processes.

DOMAIN KNOWLEDGE

1 Domain: Ecommerce

As Ecommerce domains are one of the most developed platforms, it becomes very crucial to have a hands on experience on testing these websites in perspective of finding errors as it has high chances of failures due to complex integration of logic.

2 Domain: CRM

The Customer Relationship Management (CRM) domain focuses on managing a company's interactions with current and potential customers. The CRM domain involves validating functionality, performance, security, and usability of systems that handle customer data, sales, marketing, and service processes.
