About this program:

This course provides a comprehensive introduction to API Testing, equipping learners with the skills to ensure the reliability, functionality, and performance of Application Programming Interfaces (APIs). The course covers both manual and automated testing techniques and emphasizes best practices for validating RESTful API's. Participants will explore key concepts such as HTTP methods, status codes, request/response structures, authentication, and API documentation. Hands-on exercises using popular tools like **Postman** and **Burpsuite**.

Projects

Why API Testing:

API testing is important for several key reasons, especially in modern software development where APIs are the backbone of communication between services, applications, and systems. API Testing helps in Ensuring Core Functionality Works, Detects Issues Early, Validates Security etc.

Who is this course for

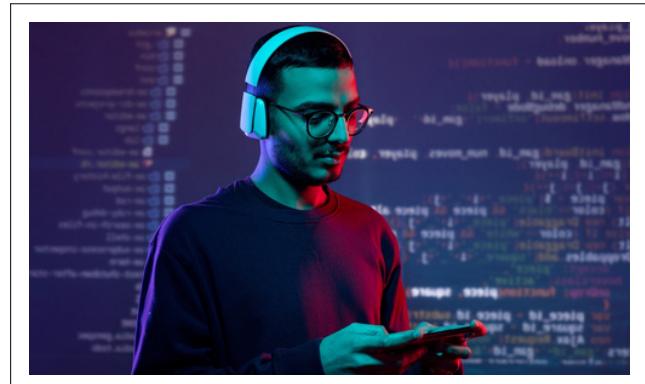

Anyone from non IT background who wants to build a career in IT

Anyone who is stuck in some non technical job with no scope or growth

Anyone who wants to start as a fresher in IT industry, Students from BSc and Engineering background

You are already a tester but not familiar with the basics and fundamentals

What you'll be doing

You'll be trained on all the relevant topics and concepts in Software Testing and immediately after you'll apply all the knowledge practically on real time projects using appropriate tools. All the tasks and activities are managed and monitored by working testers who are constantly in touch with the industry demands giving you a slight edge over normal teachers. During the course we'll be emphasizing more on the practical aspect rather than theoretical.

Career growth and scope

As reliability on Software is increasing continuously more and more Software and applications are getting developed for the smallest of tasks. In order to keep them working smoothly and to make sure they run without any issues software testers are required to continuously monitor and run maintenance checks on these applications and software. So this summarizes the scope of software testing. It'll keep on growing until there are software and applications being used.

Why learn from Cinute Digital?

Only skill up is not enough, you need a helping hand who has been in the industry for a long time and knows the industry in and out. Apart from it, networking, we have partnered with top colleges across Mumbai and tie ups with various IT service provider companies which enables us to get our students placed easily.
