## Why Automation Testing

If you are stuck in your field with no scope or growth in future or your domain has reached a saturation point and you want to build yourself a stable longterm career in IT, Manual Testing should be your go to option. As manual testing does not require coding knowledge you'll feel extremely comfortable to lean into it and this is the reason anyone from IT or non IT can learn and start working on Testing Projects.

## Who is this course for

Anyone from non IT background who wants to build a career in IT

Anyone who is stuck in some non technical job with no scope or growth

Anyone who wants to start as a fresher in IT industry, Students from BSc and Engineering background

You are already a tester but not familiar with the basics and fundamentals

## What you'll be doing

You'll be trained on all the relevant topics and concepts in Software Testing and immediately after you'll apply all the knowledge practically on real time projects using appropriate tools. All the tasks and activities are managed and monitored by working testers who are constantly in touch with the industry demands giving you a slight edge over normal teachers. During the course we'll be emphasizing more on the practical aspect rather than theoretical.

## Career growth and scope

As reliability on Software is increasing continuously more and more Software and applications are getting developed for the smallest of tasks. In order to keep them working smoothly and to make sure they run without any issues software testers are required to continuously monitor and run maintenance checks on these applications and software. So this summarizes the scope of software testing. It'll keep on growing until there are software and applications being used.

## Why learn from Cinute Digital?

Only skill up is not enough, you need a helping hand who has been in the industry for a long time and knows the industry in and out.
